UNIQUE DESIGN

The CARDIOVIT FT-1 is an ultra-portable device, weighing just over a 2 lbs including the battery. The 8-inch high-resolution multi-touch screen can be operated with a simple swipe gesture. The completely flat and closed surface of the device is very easy to clean and highly hygienic.

HIGHLY ACCURATE DIAGNOSES

SCHILLER's most advanced algorithms are implemented in the CARDIOVIT FT-1.

PEDIATRIC EKG: Thanks to very high sampling frequency and a large frequency band, the CARDIOVIT FT-1 offers optimal signal quality which makes it the ideal tool for pediatric EKG.

RESTING RHYTHM: The FT-1 records all 12 channels for up to 4 minutes. This reduces the risk that important rhythm data might be overlooked. The recordings can be printed, stored, reviewed and transmitted.

INTERPRETATION: ETM, one of the industry's most renowned, simultaneous 12-lead EKG interpretation programs for compromising quality and reliability.

ALWAYS CONNECTED

Bidirectional communication allows for easy data access via worklist or PDQ, and fast transmission of EKG reports to EMR/HIS systems. Connectivity through secure WiFi protocols, combined with EKG review on display and a large memory, supports reliable paperless workflows and cost saving.

SCHILLER LINK: Easy-to-use software to import patient data from the EMR system and export customized PDF reports directly on the PC.

- The high-precision thermal printer (8 dots/mm) is designed to last for many years of troublefree operation

- The anatomical hook up adviser helps to place the electrodes correctly with zoom-in and rotate functions for optimal view

- EKG overview of all 12 channels including colour-coded lead quality check

- In case of lead reversal, warnings and misplaced electrodes are immediately displayed before EKG acquisition

EASY 1-2-3 STEPS

- 1- Enter or download patient data
- 2- Control signal quality and perform EKG
- 3- Review EKG before storing, exporting or printing. Users are free to go back and forth through the steps

The background of the entire page is a repeating pattern of stylized hearts and lungs in a light gray color. The hearts are simple outlines, and the lungs are also simple outlines showing the main lobes. The pattern is dense and covers the entire area.
